

# I\*I Course Material

## Acknowledgements ....

- CIIR's Information Integrity knowledge development initiative is built around the activities of entrepreneurship, networking, research and publications. In the process, Information Integrity course material developed in the form of lecture serial has drawn heavily from papers published at international and national conferences and journals, referrals, seminars, workshops, white papers, on-going I\*I research, and formal and informal research discussions at international and national forums.
- Special mention is made of significant inputs received from Prof. V. Rajaraman, Prof. N. L. Sarda, Mr. Madhavan Nayar, Prof. Ramesh, Prof. K. Narayanan, Prof. Martha Evens, Prof. Steve, Prof. R.S. Tiwari, Prof. S.P. Kallurkar, Dr. Parvati Rajan, Prof. Kamana Malik, Prof. Reema Khurana, Ms. Natasha Kapoor, Mr. Prashant Mahadeokar, Prof. Manisha Dale, Prof. Milind Mali, Prof. Kashinath Munde and Prof. Pandurang Patil.
- Also acknowledged are valuable inputs received from members of Information Integrity Coalition, Chicago and CIIR's special interest group members.

# I\*I Course Material

## A Prayer...

- CIIR's Web pages present Information Integrity course material as a lecture Serial.
- This very presentation format makes the course amenable to the innovation of eCourse development and delivery, where the content can seamlessly flow between designer, deliverer (teacher) and student (recipient).
- As a totality of the teaching-learning activity, thus, what we have before us is an internetworked education process in which the learner - external (i.e., student) and internal (i.e., teacher) - can now *own* (as against being mere recipient or purveyor) the teaching-learning design and delivery as per individual requirements (at the PG, UG, certificate levels as the case may be) and on up-to-date, current basis. This calls for application of team learning and research principles with flexibility even in traditional classrooms.
- For the exploratory knowledge workers - that the education and research community aims to be for its competitive survival - this provides an opportunity for global vision of knowledge contribution and participation.
- CIIR invites all to join in this knowledge development initiative.
